FOR IMMEDIATE RELEASE

Innovative TellerTM Teller Line Technology Now Integrated with KeyStone Core

WRG's leading TellerTM for Verifone[®] teller multimedia terminal software is now fully integrated with Corelation's KeyStone core, introducing next-generation teller line functionality to a wider audience of credit unions.

Pasadena, Calif. – January 20, 2021 – Technology CUSO Wescom Resources Group (WRG) is excited to announce the full and seamless integration of its TellerTM for Verifone[®] teller line software with Corelation Inc.'s KeyStone credit union core processing system.

"We are thrilled to expand on our long-time partnership with Corelation by introducing the innovative features of Teller to nearly 140 credit unions on the KeyStone core," says Kerry Dolan Schiappa, Director Sales & Marketing at WRG.

With advanced features like account identification and lookup, card swipe member authentication, account balance display and transaction confirmation, the Teller system utilizes Verifone's market-leading retail multimedia terminals to provide members with a colorful, interactive and fully secure teller line banking experience.

"Most terminal technologies are deployed to facilitate electronic signatures," says Tim Maron, Chief Revenue Officer of Corelation. "Teller does much more, including card swipe member authentication with PIN validation, the ability to display custom promotions and updates of member information on the device.

"Most importantly, Teller provides members with a secure and safe method of validation without verbally stating any personal data. This expedites the member interaction, providing staff with more time for meaningful discussions with members."

As the first credit union to go live with Teller on KeyStone, TCU Federal Credit Union of Tulsa, Oklahoma looks forward to deploying the software's game-changing benefits.

"Teller meets our member's expectations for a great experience, matching those they have with other types of businesses," says Andy Tripp, Senior VP of Information Technology at TCU.

“As a CUSO, WRG understands credit unions. They are familiar not only with operational processes, but also with member needs. WRG’s integration over the Corelation Keystone API opens up a new realm of possibilities for the future.”

According to Maron, Corelation’s and WRG’s history of working together to solve for credit unions’ unique needs helped make the Tellerly integration possible.

“From our initial partnership with WRG through today, it’s been a true collaborative experience,” Maron says. “WRG understands technology and matches our philosophy in delivering solutions in a highly efficient manner.”

About Wescom Resources Group

Backed by Wescom Credit Union, one of the nation’s largest credit unions with over \$4 billion in assets and nearly 200,000 members, Wescom Resources Group provides credit unions with advanced technology solutions that increase their competitive edge.
